Education

University of California, Berkeley

M.S. Computer Science, Advisor: Dr. Daniel Garcia

Thesis: Lambda — An Autograder for Snap!

Berkeley, CA

2015–2016

University of California, Berkeley

B.A. Computer Science

Berkeley, CA

2011–2015

Positions

UC Berkeley EECS & Data Science

Continuing Lecturer

Berkeley, CA

July 2025 – Present

UC Berkeley EECS & Data Science

Lecturer

Berkeley, CA

July 2019 – June 2025

Full-time lecturer, actively involved in EECS undergraduate curricular matters and pedagogy. Primarily responsible for CS 88 / DATA C88C, an introductory CS course for data science students; share work in many activities for training student instructors and advising summer instructors.

Gradescope (acquired by Turnitin, 2018)

Software Engineer

Berkeley, CA

July 2016 – July 2021

Early software engineer from startup through acquisition. Responsible for web accessibility and conference presentations. Part-time starting Fall 2019.

- Led web accessibility work; addressed compliance with WCAG 2.0/2.1, set up automated front-end accessibility testing, and trained engineers in the wider Turnitin organization.
- Built modern AWS-hosted data pipelines for user onboarding and product analytics.
- Collaborated with the design team on new platform features and provided customer support and training.

UC Berkeley EECS

Researcher and Engineer

Berkeley, CA

2016–2018

Part-time role focused on Snap! and The Beauty and Joy of Computing projects (funded via Hopper-Dean Foundation grant).

Research Interests

○ Computer Science Education

Most experienced in high school, CS0, and CS1 courses. Particularly interested in exploring and improving structural issues in courses, such as sound principles for course policies, teaching with teams, and effective use of education technology.

○ Digital Accessibility

Experience building tools for software teams to improve the accessibility of web applications. Interested in improving methods for automatically detecting accessibility defects and recommending corrections, and in building accessible CS courses and materials to teach accessibility to students.

Teaching — UC Berkeley

Course Descriptions.....

CS 10 *The Beauty and Joy of Computing* (4 units). Non-majors introduction to computer science. Hands-on, project-based course taught using Snap! and Python. cs10.org

CS 88 / DATA C88C *Computational Structures for Data Science* (3 units). CS1-or-1.5 course for data science majors, based on Sussman's SICP and taught in Python. c88c.org

CS 169 *Engineering Software as a Service* (4 units). The original software engineering course, later split into CS169A and CS169L. saasbook.info

CS 169A *Engineering Software as a Service* (4 units). Upper-division course on modern software engineering through RESTful design, HTTP, and team projects. saasbook.info

CS 169L *Software Engineering Team Project* (4 units). Follow-up to CS 169A; teams build a semester-long project for a campus organization or local nonprofit. saasbook.info

CS W186 *Introduction to Databases* (4 units). Upper-division databases course offered in an online format.

CS 194-23 *Art & Science of Digital Photography* (4 units). Highly technical photography course bridging art and engineering.

CS 195 / CS H195 *The Social Implications of Computing Technology* (1 / 3 units). Course exploring the unintended consequences of computing, including the culture of how we build programs. H195 is an honors course where students complete a small research project.

CS 294-188 *Design and Evaluation of CS at Scale* (1 unit). Pedagogy course for teaching assistants on course-course collaborations and current computing-education pedagogy.

CS 294-189 *Designing CS Education at Scale*. Graduate course in which small teams design, evaluate, and document how we teach large postsecondary computing courses, surveying current instructional practices and prototyping assignments that foster critical thinking. berkeley-cs294-189.github.io

CS 302 *Designing Computer Science Education* (3 units). Course preparing students to be the instructor of record for a summer CS course.

CS 375 *Teaching Practicum* (2 units). First-time CS teaching assistant training.

DATA 101 / CS C187 *Data Engineering* (4 units). Upper-division course putting databases into practice. Topics include SQL, window functions, indexing, design, ETL, NoSQL, and graph databases. data101.org

Teaching Assignments.....

- * denotes courses that were co-taught.
- Spring 2020 included an abrupt switch to remote instruction.
- Fall 2020 and Spring 2021 were entirely remote semesters.
- Fall 2021, Spring 2022, and Fall 2022 included significant hybrid teaching components.
- **Summer 2026**
Faculty Co-Director, EECS Summer Program (10 courses)
- **Spring 2026**
DATA C88C (500 students, 14 staff), CS 169L (18 students, 2 staff), CS 302 (8 students, 1 staff)
- **Fall 2025**
DATA C88C (550 students, 13 staff), CS 169A (140 students, 3 staff), CS 294-189* (16 students, 0 staff)
- **Summer 2025**
Faculty Co-Director, EECS Summer Program (10 courses)
- **Spring 2025**
DATA C88C (550 students, 14 staff), CS 169L (18 students, 3 staff), CS 302 (25 students, 1 staff)
- **Fall 2024**
DATA 101* (450 students, 12 staff), CS 169A (280 students, 5 staff)
- **Summer 2024**
Faculty Co-Director, EECS Summer Program (11 courses)
- **Spring 2024**
DATA C88C (500 students, 14 staff), CS 169L (16 students, 2 staff), CS 302 (20 students, 0 staff)
- **Fall 2023**
DATA C88C (460 students, 10 staff), CS 169A* (270 students, 6 staff)
- **Summer 2023**
Faculty Director, EECS Summer Program (10 courses)

- **Spring 2023**
DATA C88C (500 students, 15 staff), CS 169L* (20 students, 1 TA), CS 302 (24 students, 0 staff)
- **Fall 2022**
CS 88 (450 students, 14 staff), CS 169A (240 students, 7 staff), CS 195/H195 (300 students, 1 TA)
- **Summer 2022**
Faculty Co-Director, EECS Summer Program (10 courses)
- **Spring 2022**
CS 88 (420 students, 12 staff), CS 10 (150 students, 6 staff), CS 302* (25 students, 1 reader)
- **Fall 2021**
CS 88 (400 students), CS 169A* (300 students), CS 294-188 (10 students)
- **Spring 2021**
CS 88 (400 students), CS 195 (400 students), CS 169L* (60 students)
- **Fall 2020**
CS 88 (360 students), CS 169A* (300 students)
- **Spring 2020**
CS 88 (300 students), CS W186 (700 students), CS 195* (400 students)
- **Fall 2019**
CS 88 (240 students, 8 staff), CS 169 (120 students, 4 staff), CS 375 (80 students)
- **Summer 2015**
CS 10* (60 students, 5 staff)
- **Spring 2015**
Head TA, CS 10 (330 students)
- **Fall 2014**
Head TA, CS 10 (330 students)
- **Spring 2014**
Head TA, CS 10 (300 students)
- **Fall 2013**
TA, CS 10 (300 students)
- **Spring 2013**
TA, CS 194-23 (30 students); TA, CS 10 (300 students)

- **Fall 2012**
TA, CS 10 (240 students)

Awards

- UC Berkeley Lecturer Teaching Fellows, 2019–2020
Year-long project on Parsons Puzzles in intro CS courses.
- Best Lightning Talk Award, 49th ACM Technical Symposium on Computer Science Education, 2018
Awarded for the lightning talk "IRT in 5 Minutes."
- Eugene L. Lawler Prize, 2015, UC Berkeley EECS
The Lawler Prize honors computer science undergraduates from disadvantaged groups, or who have surmounted unusual difficulties in pursuing a degree with demonstrated academic effort. Established by the UC Berkeley Computer Science Division to honor the memory of Professor Eugene L. Lawler.
<https://www2.eecs.berkeley.edu/Students/Awards/#11>
- EECS Distinguished Graduate Student Instructor Award, 2015, UC Berkeley EECS
Selected from the top 9% of UC Berkeley EE/CS GSIs and group tutors. The department selects one top EE and one top CS GSI for the award each year.
<https://www2.eecs.berkeley.edu/Students/Awards/#13>

Grants and Gifts

- SAP, Snap!/Cloud Operations (2026), \$250,000
A ten-year gift funding the ongoing operations of the Snap!/Cloud, the project storage and sharing infrastructure behind Snap!.
- UC Berkeley Instructional Technology Micro-Grant (2024–2025), Lisa Yan, Michael Ball, \$50,000
Following a successful first year, awarded subsequent funding to continue work with a focus on accessibility and sustainable maintenance of educational tools.
- UC Berkeley Instructional Technology Micro-Grant (2023–2024), Lisa Yan, Michael Ball, \$50,000
Year-long pilot through the Vice Provost's Office; coordinated a team of students modernizing educational tools for CS and DS courses. Collaborated closely with Research, Teaching, and Learning to share custom tools with larger campus groups.
- UC Berkeley Presidential Chair Fellows (2021–2022), Pamela Fox, Michael Ball, \$22,500
Year-long grant through the Center for Teaching and Learning to add Parsons Problems — interactive puzzles that lower the burden of memorizing syntax — to CS61A and CS88.
- NSF EAGER, Student Mission Control for the International Space Station (Award #2027260) (2021–2024),

Research Engineer (Dan Garcia, co-PI), \$298,944

Funding to support development of an API, website, "Student Mission Control" interface, and curriculum modules centered on data streaming out of the ISS.

- Hopper-Dean Foundation BJC (2020–2023), Dan Garcia, PI, \$600,000
Sponsored development of the Beauty and Joy of Computing curriculum. Helped create BJC Sparks, a new functional-first middle-school curriculum, and contributed engineering for the Spanish translation of the high-school CS Principles course and the Snap! programming language.
- UC Berkeley College of Engineering, Course Adaptation and Remote Delivery (2020), Dan Garcia, co-PI, \$60,000
Question generators and MOOC-like videos and quizzes for remote CS61C, CS10, and CS169A.
- Hopper-Dean Foundation, Accelerating CS Diversity Programs Fund (2019), Dan Garcia, PI, \$600,000
The foundation granted \$3M to the department to fund diversity initiatives. Summer salary supported the middle-school curriculum, Spanish translation, software development, and staff.
- Hopper-Dean Foundation (2016), Researcher (Daniel Garcia, PI), \$200,000
Diversity initiatives in CS to support high schools nationwide. The course CS10 / Beauty and Joy of Computing was developed into an AP course, delivered through an edX SPOC.
- Google CS Engagement Award (2015), Michael Ball, \$5,000
Gift to support CS10 and the Beauty and Joy of Computing. Funds were used to develop Snap! enhancements and help fund the Snap!Cloud infrastructure.
- Google's 3X in 3 Years (2015), Student Researcher (Dan Garcia), \$900,000
Three-year project to grow undergraduate capacity and support diversity via "Scaling Computer Science through Targeted Engagement." Goals included reducing the intro GPA gap, increasing software-engineering enrollment, and tripling women and URM CS majors.
- NSF STEM-C BJC4NYC: Bringing the Beauty and Joy of Computing to the Largest School System in the US (2014), Consultant, \$7,874,876
Curricular materials, based on the Beauty and Joy of Computing, for teaching CS Principles at the high-school level using Snap!. Trained 100 NYC high-school teachers; reviewed/edited curriculum with EDC; developed BJCx (with auto-grading) as a SPOC; supported teachers online.
- edX (2014), Staff, \$50,000
Development of BJCx, a CS Principles edX MOOC offered as a synchronous SPOC for high schools, a synchronous open MOOC, and an asynchronous self-study course. Supported Snap! cloud integration, autograding, and online support for students and teachers.

Students Supervised

- May 2026: Rebecca Dang “Beyond the Autograder: Improving Feedback on CS Student Metacognition via the Assignment Snapshots Tool”
Co-advised with Lisa Yan
<https://www2.eecs.berkeley.edu/Pubs/TechRpts/2026/EECS-2026-196.html>
- May 2025: Edwin Vargas-Navarro
Co-advised with Lisa Yan
- May 2021: Alex Kassil “Active Academic Integrity”
Co-advised with John DeNero
<https://www2.eecs.berkeley.edu/Pubs/TechRpts/2021/EECS-2021-157.html>
- May 2020: Mansi Shah “Exploring the Use of Parsons Problems for Learning a New Programming Language”
2nd Reader; advised by Dan Garcia
<https://www2.eecs.berkeley.edu/Pubs/TechRpts/2020/EECS-2020-88.html>
- May 2020: Harikaran Subbaraj “Using Dataflow for Machine Learning Inference”
2nd Reader; advised by Joey Gonzalez
<https://www2.eecs.berkeley.edu/Pubs/TechRpts/2020/EECS-2020-75.html>

Service

Professional Service.....

2026: AP Computer Science Principles Exam Table Leader, College Board
2025: AP Computer Science Principles Exam Reader, College Board
2024: SIGCSE Online: 2024 Posters and Lightning Talks Program Chair
2024: Snap/shot 2024 Co-Organizer; Technical Lead
2023: Snap/Con 2023 Co-Organizer; Technical Lead
2022: Snap/Con 2022 Co-Organizer; Technical Lead
2021: Snap/shot 2021 Mini-Conference Co-Organizer; Technical Lead, December 2021
2021: Snap/Con 2021 Co-Organizer; Technical Lead
2021: SIGCSE Technical Symposium Publicity Co-Chair
2021: SIGCSE Technical Symposium Associate Program Chair / Senior Reviewer “Experience Reports and Tools”
2020: Snap/shot 2020 Mini-Conference Co-Organizer; Technical Lead

2020: Snap/Con 2020 Co-Organizer; Technical Lead

2020: SIGCSE Technical Symposium Publicity Co-Chair

2018–2020: SIGCSE Technical Symposium Computer Science Principles Providers and Teachers Forum Co-Organizer

Launched because there had been no formal face-to-face community for providers and teachers of CSP to discuss best practices, feedback, or share teaching experiences at SIGCSE.

2018: SIGCSE Technical Symposium Photography Chair

2016–2020: SIGCSE Technical Symposium Reviewer

Departmental & Institutional Service

2025–2026: UC Berkeley EECS Summer 2026 Instruction, Faculty Co-Director

2026: UC Berkeley Unit 18 Faculty Excellence Review Committee (Lecturer in Computer Science)

2024–2025: UC Berkeley EECS Summer 2025 Instruction, Faculty Co-Director

2025: UC Berkeley Unit 18 Faculty Excellence Review Committee (Lecturer in Economics)

2024–2025: UC Berkeley EECS Computer Networks and Instructional Labs Committee

2023–2024: UC Berkeley EECS Summer 2024 Instruction, Faculty Co-Director

Hired 10 Unit 18 Lecturers; involved in union- and campus-level negotiations.

2023–2026: UC Berkeley Teach-Net Faculty Community Moderator

Campus-wide community of 1,000 faculty, staff, and administrators.

2022–2023: UC Berkeley EECS Summer 2023 Instruction, Faculty Director

2019–2025: UC Berkeley EECS Undergraduate Study Committee

2021–2022: UC Berkeley EECS Summer 2022 Instruction, Faculty Co-Director

2021–2022: UC Berkeley: Research, Teaching & Learning Faculty Advisory Committee, Co-Chair

2020–2023: EECS Department Student Grievances Committee, CS Chair

2020–2021: UC Berkeley: Disabled Students Program Faculty Advisory Committee, Member

2020–2021: UC Berkeley: Research, Teaching & Learning Faculty Advisory Committee, Member

Winter 2020–2021: UC Berkeley Working Group: Online Proctoring Policies, Member

Spring 2020: UC Berkeley Working Group: Best Practices for Remote Exams, Member

2016: UC Berkeley EECS Graduate Student Instructor Survey Presentation for Faculty

2014–2015: UC Berkeley EECS Undergraduate Study Committee, Student Member

Academic & Open Source Software

Snap!

Snap! is a blocks-based visual language designed to make teaching computer science easy while exposing hard concepts like lambdas, recursion, and web APIs. I contribute to the core IDE, and I collaboratively designed and built, and continue to maintain, the Snap!Cloud project infrastructure, which currently supports more than 10 million projects and 1 million users.
<https://snap.berkeley.edu>

The Beauty and Joy of Computing

BJC is a university-level non-majors or high-school AP CS Principles course designed to broaden participation in computing. In addition to programming, the course emphasizes the context and implications of computing. I provide infrastructure maintenance, technical consulting, and curriculum review, and contributed heavily to early versions of the course still used at UC Berkeley.

<https://bjc.berkeley.edu>

Flexensions — Assignment Extension Management

Web application that streamlines requesting, approving, and applying assignment extensions in Canvas. Originally piloted with support from Berkeley's Research, Teaching, and Learning unit, the tool reached 10,000+ student enrollments across two semesters. Supervised a team of 12 students and led the campus integration with Canvas and partner units.

<https://github.com/berkeley-cdss/flexensions>

Alonzo, A Staff Chatbot

Course staff chatbot that automates grading workflows, including in-class oral lab check-offs for CS10. Maintained across multiple generations of TAs.

<https://github.com/cs10/Alonzo>

Downshift

Prior maintainer of Downshift, an open-source React component (3M weekly NPM downloads). Contributed accessibility enhancements and reviews.

<https://github.com/paypal/downshift>

Technical Skills

- **Programming Languages:** JavaScript, Ruby, Python, Snap!, SQL, Lua, Bash, CSS/SASS, HTML. Less frequently used: Scheme, C, Java, Apex, MATLAB.
- **Development Tech:** Agile development, RESTful design, Ruby on Rails, Git, React, accessibility testing and compliance, PostgreSQL, AWS / GCP, Heroku, Terraform, software testing, continuous integration.
- **Media Engineering:** Semi-professional photographer, videography, online event production, audio recording, Final Cut Pro X, Adobe Creative Suite, advanced Zoom programming.
